

North Tabor Neighborhood Association Transportation and Land Use Agenda

Nov 3, 2015 New Heights Physical Therapy, 5736 NE Glisan Street, 6:30-8:00 PM

1) East Multnomah County “Back to Nature” Conservation Grant

Informational briefing. This grant could give us up to \$10,000 without matching funds for a one year project, or significantly more for a multi-year project with matching funds from other agencies like BPS and PBOT. This money could be used to create a “Back to Nature” walkway from the MAX station east through the Pocket via NE Oregon to connect to Rosemont Bluff. This could include:

- Restoration of Rosemont Bluff
- Educational Displays
- Community garden
- Natural play area
- What are your ideas?

<http://emswcd.org/about/>

Who is interested in working on this? Applications are due Dec 15 for the 2016 grant cycle. I will have briefing materials, but this would need to be a community effort for it to succeed! Come join us and we could create a “Back to Nature Working Group!”

2) The Comprehensive plan timeliness, comments to city council, and review of North Tabor request and how they were integrated. How did we do?

3) The Mixed Use Corridors project and the Comprehensive Plan (Glisan 47th to 62nd and Burnside 53rd to 61st.) When the new zoning map takes effect where will CM2 (mixed use, Neighborhood scale) be allowed outright and where are we holding off zoning until later.

4) Discussion of the Residential zoning map and our mediated discussion on Nov 17th hosted by BPS (Bureau of Planning and Sustainability)

5) Following up on NE Halsey, the TGM Grant, the 70's bikeway integration to North Tabor and any concerns YOU may bring.

Hope to see you there!

Terry Dublinski-Milton
North Tabor Transportation and Land Use Chair
